C	#10 x 3/4" square pan head screws x 7

INSTALLATION REQUIREMENTS

Recommended Installation Range	5.5 - 6.0 ft-lb (66 - 72 in-lb) $\approx 70 - 75\%$ of strip torque
Maximum (Do Not Exceed) Beyond this, thread damage risk	6.0 ft-lb (72 in-lb)
Typical Angle After Snug Expected rotation on low-speed driver	$30^\circ \pm 10^\circ$

**Drill should be set to Low speed setting.*

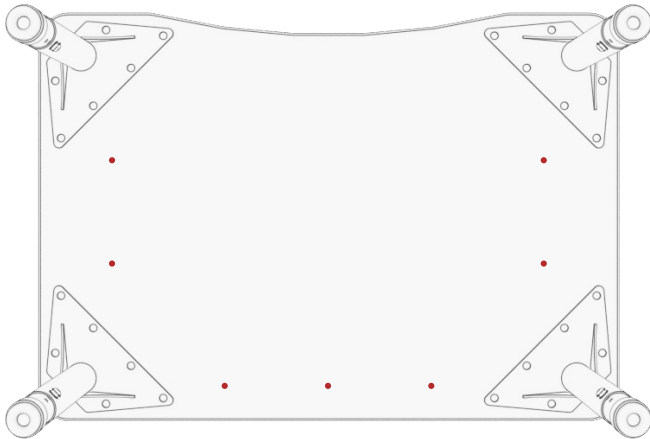

NOTE: Hardware packs are included in packaging. You may receive more hardware than needed. Discard any extra hardware after assembly.

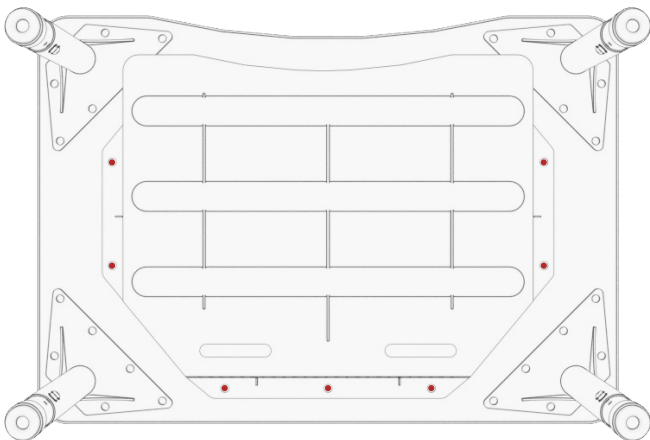

The assembly of this desk accessory requires the assistance of another person.

ASSEMBLY

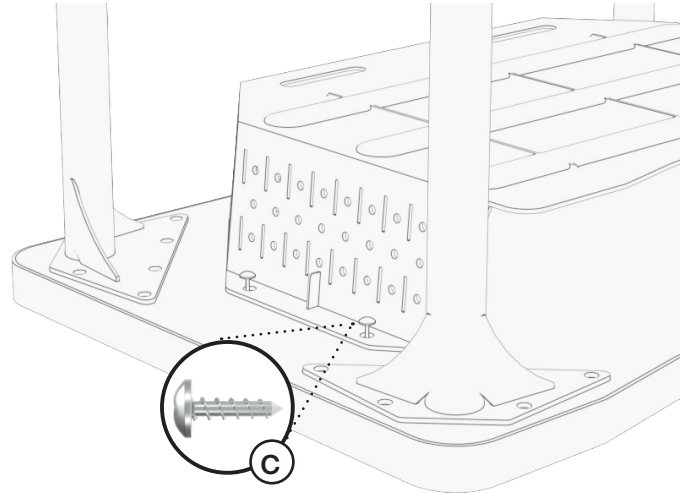

1. With the help of another person, place **Part A** face down on a protected flat surface so the pre-drilled pilot holes are facing up. Legs are to be pre-assembled to the top before assembling the book box. *Pre-drilled pilot holes are shown in red for illustrative purposes only.*

2. Align pre-drilled holes in **Part B** the book box tabs over the pre-drilled pilot holes (shown in red) on **Part A**.

3. Use a long R2 drive bit and a drill to fasten **Hardware C (wood screw)** through each tab on the plastic book box and into the desktop. **Torque to 5.7 ft/lb*

CAUTION! Only use WOOD SCREWS when attaching the book box to desktop. *Torque screws to 5.7 ft/lb*

4. With the help of another person, turn desk over to the upright position.
